# Winnipeg.

The Gateway of Western Canada. The youngest and most rapidly growing City in America. The spot where less than twenty years ago was almost virgin prairie. The home of the "Noble Red Man" and the feeding grounds of the countless herds of Buffalo that roamed over the "Great Lone Land" as it was then called, has now become a hustling busy City of over one hundred thousand Inhabitants, with many miles of Asphalt Streets, wide Granolithic Sidewalks, Electric Light, Gas, miles of Street Cars, beautiful Parks, handsome Residences, Churches and Public Buildings. Its main thoroughfares lined with elaborate Commercial Buildings, Banks with their marble and bronze fittings, Massive Wholesale Warehouses overflowing with the Worlds products of every description, Iron Works and Foundries, Flour Mills, Breweries, and an enormous number of manufacturies of all kinds.

The Railway connections are excellent. The Canadian Pacific having one of the largest yards in America. The Canadian Northern rapidly extending its main line and branches towards the Pacific Coast. Two more Transcontinental roads whose contracts to build have been already let. The Grand Trunk Pacific and the Great Northern will mean work for thousands for several years to come.

The rapid rate at which the newer provinces of Alberta and Saskatchewan are filling up with farmers, and the great number of villages and towns that are being built up as a necessary adjunct provide an ever increasing market for the manufacturers and wholesalers of the city of Winnipeg.

Investors can make no mistake in locating in this district, as there is not the slightest doubt but that the population of the city will be doubled or even trebled in the course of the next decade, especially as the Civic authorities are arranging to supply cheap electric power for manufacturing purposes and everyone knows what this means in developing the growth of a great City.
